The order of Dean Jones is the outcome to the movement to take away from "tap day" its spectacular and public features, in which the disappiontment of men not elected to the societies has been a painful incident. The prohibition of Dean Jones is believed to forecast other changes of "tap day," which as an institution has been sharply criticized by many graduates, and would probably have been abolished but for the difficulty of finding a substitute method of giving out the senior society elections. Some ten years ago it was reported that the elections by the "tap day" method would not be allowed by the Yale authorities, but no order to that effect was lesued.
